#### So What's So Hard?

- The Rule of 1/8:
  - "One must bear in mind that 1/2 of organizations won't believe the connection between how they manage their people and the profits they earn. 1/2 of those who do see the connection will do what many organizations have done-try to make a single change to solve their problems, not realizing that the effective management of people requires a more comprehensive and systematic approach. Of the firms that make comprehensive changes, probably only about 1/2 will persist with their practices long enough to actually derive economic benefits."
- Bottomline: less than 12%...it's hard...TMI

#### **How Do We Know Things About** OB?

- Where does the knowledge in this textbook come from?
- Understanding that requires an understanding of how we know things, in general

#### **How Do We Know Things** about OB?

- · How do we know about what causes:
  - People to get sick?
  - · People to stay healthy?
  - Children to grow up happy?
  - Children to be well-behaved?
  - Employees to be satisfied with their jobs?
  - Employees to be skilled at their jobs?

#### **How Do We Know Things** about OB?

- · Methods of Knowing
  - Experience
  - Intuition
  - Authority
  - Science
- · What are the benefits of the last one, relative to the other three?

## **How Do We Know Things about OB?**The correlation

- - Perfect positive relationship: 1
  - Perfect negative relationship: -1
  - Strength of the correlation inferred from judging the compactness of a scatterplot of the X-Y values
    - More compact = stronger correlation
    - Less compact = weaker correlation

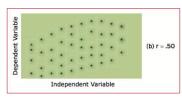

#### **The Correlation**

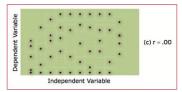

#### **The Correlation**

- How big is "big"?
  - What's the correlation between height and weight?
  - · Will the correlation between job satisfaction and job performance be higher or lower?

#### **The Correlation**

- · Important Disclaimer
  - Correlation does not prove causation
- · Proving causation requires:
  - Correlation
  - Temporal precedence
  - Elimination of alternative explanations

#### **How Do We Know Things** about OB?

- The correlations from multiple studies get averaged together using a technique called meta-analysis
- Meta-analyses can then form the foundation for evidence-based management--the use of scientific findings to inform management education and practice

#### How Do We Know Things about OB?

- · Well-supported theories become helpful tools for answering why questions, including:
  - · Why your best and worst coworkers act so differently
- · Why you sometimes think, feel, and act a certain way

#### **Summary: Takeaways**

- What is organizational behavior?
- Does it matter?
- · How do we "know" things about OB?
